

Missouri Sheep and Goat Producer's Survey

Missouri sheep and goat producers – we need YOUR help!

Specialists from Lincoln University and the University of Missouri want to better understand the inner workings of sheep and goat production in the Show-Me State.

- This fall, a survey will be distributed to capture information about costs, profits and marketing channels.
- Findings will be used to develop a detailed report about Missouri's sheep and goat industry, as well as its economic impact.
- Together, we'll pave the way for educational opportunities and informed policy decisions, ultimately strengthening the industry.

Ready to make your voice heard? Share your email, and we'll reach out when the survey launches:
